DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Juan Marquez (Reg# 34,072) on 2/7/07.

The application has been amended as follows:

Claims 9,10 and 13-16 have been canceled.

Allowable Subject Matter

Claims 1-8, 11 and 12 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach the combination of diagnosing existing conditions, repairing the equipment to reach a start-up standard, developing a maintenance schedule and providing the warranty. For instance, an automobile dealer will diagnose a car's existing conditions, repair it to reach a start-up standard (state inspection, for instance), however, they do not develop the maintenance schedule (the manufacturer does, not the seller), and while they have a division that provides a warranty, that warranty does not use the start up standard (inspection) as its standard as state inspections requirements include general maintenance items such as: lights, brakes and tires and

Art Unit: 3629

further requires such items as windshields, tires and mirrors to be in good shape.

Warranties are not known to cover these items. Insurance covers damage to windshields while some auto dealers do cover maintenance items, they don't cover damaged items.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US PAT 6,580,982 to Sinex discloses a method of managing maintenance issues on equipment but does not teach achieving a start-up standard or warranting the item by a third party.
